

GlobalSoft Spreadsheet Server

ORACLE CERTIFIED
PARTNER

Financial information needs to be reviewed almost daily to ensure its accuracy and integrity. Business Managers need this financial information in real-time and available to them in software that is familiar. Spreadsheet Server is software that works just like an excel spreadsheet, and integrates easily with your ERP software.

The Spreadsheet Server Tool is becoming the tool of choice for many Business Managers because of its ease of use. Users of Spreadsheet Server can simply open a spreadsheet, change a period, an account number, or other relative factor, and instantly see their real-time financial balances. When drilling down within the spreadsheet to the detail level, individual transactions can be monitored.

Spreadsheet Server is available for use in connection with the following financial systems:

- JD Edwards®
- Oracle®

Key Features of Spreadsheet Server Include:

- Leverage your spreadsheet skills and compile reporting within minutes.
- True Real-time access to critical financial data within seconds with familiar tool Microsoft Excel spreadsheet add-in.
- No IT intervention, user installable, no power users in IT necessary. Users 'live' producing reporting within hours.
- No more downloading, cut/paste, exporting, staging areas, data warehouses or re-keying of data.

- Preconfigured 'out of the box' settings customised for each general ledger ERP package specified above.
- Increase the efficiency and timeliness of your budgeting process.
- Save financial user's time by combining reporting, account inquiry, and journal inquiry into one application.
- Perform corporate consolidations with instant access to real-time data.
- Retrieve real-time period, year-to-date, quarter, opening and closing balances.
- Retrieve account descriptions.
- Retrieve balances using ranges or wildcards.
- Drill-down from within Microsoft® Excel Spreadsheet to the lowest level of detail including specific subsystem drill-downs for each ERP general ledger.
- Distribute your .xls, .pdf, zip file, .doc, etc. using our fully automated email distribution manager.
- Allow storage of financial data for remote computing.
- Advanced security by user.
- Reduce number of days to close your books by 3.2 days.
